

**University Technology Committee
Report to University Council
Tuesday, February 12, 2008**

We encourage other University committees to facilitate teleconference participation in University committees as Pacific continues to grow in number at multiple campuses.

BoxerApps

UTC approved and forwarded to UIS the decision that all students must register for a BoxerMail account for their e-mail was unanimously passed at our December 11 meeting. This will ensure that all students have access to the collaborative opportunities provided by BoxerApps (GoogleApps).

Goals for Spring Semester

- Develop list and information about emerging technologies and their impact on teaching and learning. This will hopefully turn into a proposed session at the faculty pre-conference as well as session for University staff.
- Touch base with Jessica Hand and the Office of Communications about departmental webmaster responsibilities and information about the goals for the University websites.
- Distribute assessment in the Spring after final review and approval at our next meeting in February.
