

**University Technology Committee
Report to University Council
Tuesday, December 4, 2007**

We encourage other University committees to facilitate teleconference participation in University committees as Pacific continues to grow in number at multiple campuses.

Handbook Charge and Language

We have approved new handbook language describing the committee and will bring it forward in the near future.

2007-2008 Assessments

The Committee worked on editing a first draft of a University technology assessment which will include assessments for faculty, students, and staff. We are currently planning to distribute the assessment in February.

BoxerApps

Discussion was held about the BoxerApps and the utilities that are provided. Members asked about the future possibility of faculty and students being able to take advantage of the collaborative nature that GoogleApps provide within the context of BoxerApps.

Separate questions arose about the privacy and copyright concerns surrounding GoogleApps particularly if faculty and students are working on research. Discussion will continue about these possible issues.
