In 2016-2017, 56 percent of all four-year college students in the United States were women. That year, women earned 57 percent of all bachelor's degrees, 59 percent of all master's degrees, and 53 percent of all doctoral degrees.

For nearly 30 years now, women have outpaced men in attending and graduating from college. But that was not always the case. Just 30 years before the gender ratios flipped — in 1950 — a mere 32 percent of college students were women.

Pacific University was one of the first in the country, and likely in the world, to offer a co-educational higher education experience. Long before women in this country could own property, keep their own wages, or vote, they could earn bachelor's degrees at Pacific. The first, Harriett Hoover Killin, graduated exactly 150 years ago.

At Pacific, one of the cornerstones of our mission is a commitment to justice in the world. Fundamental to that is the notion that education and opportunity are rights afforded to all — and we strive to ensure that Pacific is a place of equity, diversity and inclusion, regardless of gender, race, ethnicity, or any other demographic.

We as a people are not there yet. Even as women achieve more education, they remain underrepresented in science, in mathematics, in elected office, and positions of leadership and in earnings. And people of color, both women and men, remain woefully underrepresented in all of this and in higher education.

Yet I have hope. The women featured in this issue of Pacific magazine — and so many others not named here — were pioneers in their time. They helped build the Pacific we know today and open new doors to those who would follow.

I know that our alumni and our students today are walking in their footsteps. They are breaking new ground, they are lifting one another up, and they are, like the women in these pages, step by step creating a more just and equitable world for us all.

Editor’s Letter

Pop quiz: Name an influential woman in history.
Back to that in a minute.
My kids have this beautiful pop-up book called, “The Night Pirates.”
The artwork is gorgeous, and in reviews, it is often called out as a great children’s picture book with strong female characters.
But you know what?
It’s not.
The short story is actually about a little boy who has an adventure with a gang of child pirates who take on a crew of adult pirates and win. The boy’s name is Tom, and he is the beginning and end of the tale. The villain is Captain Patch.
The rest of the characters are simply “girl pirates.” It is supposed to be empowering and defy stereotypes — and yet, the girls don’t get names, identities, or dialogue. They are there to be cute.
So many of our stories — fiction and nonfiction alike — work this way.
Back to that pop quiz.
Did you answer Marie Curie?
I did.
But not necessarily because she was amazing (she was). It’s just that, throughout my education, she was heralded as the example of a female historical figure. As though she was the only one.
Women in history? We covered Madame Curie. Check.
(For what it’s worth, my education on influential people of color also was shockingly lacking.)
The stories we tell matter. They reflect what we see — and don’t see. They teach us what to expect from the world and what we expect from ourselves.
I was deeply moved by the stories in this issue of Pacific magazine. We won’t pretend that this is a list of all the influential women in Pacific’s history, nor even of the most influential women in history? We covered Madame Curie. Check.
But in other ways, women who lived, learned and taught here had to blaze their own trails. We take a look at some of the important women who shaped Pacific in the 19th, 20th and 21st centuries. Anchovy Class 1944 pictured.

Make Way for the Makerspace ……… 20
Pacific students have a new place to make their ideas take shape — the Boxer Makerspace. It’s an inviting new area on the second floor of the Tim & Cathy Tran Library where students can use 3D printers, a laser engraver, a vacuum formbox and other tools to create prototypes of their own design. The Makerspace is a collaboration between the Berglund Center for Innovation and the Pacific University Libraries.

A Tragic Collision of Cultures

The feedback on the Spring 2019 Pacific magazine article, “A Tragic Collision of Cultures,” was humbling. We were moved by the number of people who found the story meaningful and who thoughtfully took time to tell us so. We encourage conversation around Pacific magazine stories, and we hope that you will continue to offer your thoughts and comments in the article were profound and worthy of serious reflection.

Congratulations to Eva Guggemos for her diligence in researching, documenting, and archiving the materials related to the Indian Training School. Eva’s insights and contributions of all cultures represented at Pacific, and in the country. Well done!

ROGER L. CLOSE ’70

Former Professor, Pacific University; Professor Emeritus, University British Columbia

I am sending along my congratulations to Mike Francis for his superbly crafted article “A Tragic Collision of Cultures.” The article is informative, educational, and superbly written. I have read it twice, and the second reading was as rich as the first.

JOHN MITCHELL, PHD

Former Professor, Pacific University; Professor Emeritus, University Alberta; Professor Emeritus, University British Columbia

ROBreanne Davis ’16, OT ’19 completed a family hat trick on Aug. 10, when she became the third in a set of triplet sisters to earn a graduate degree from Pacific University.

Breanne earned her doctor of occupational therapy degree during the university’s August Commencement, which celebrated the achievements of more than 300 students in the College of Health Professions.

She was presented her degree by her sister, Carmel Nichol ’16, MSW ’17, who now works in Pacific’s Office of Graduate Admissions. Carmel also surprised their third sister, Autumn Davis MBA ’19, by presenting her degree in May.

“Our whole family is a Boxer family,” Carmel said.

Their parents also attended Pacific, with their mom Lea Mourich-Davis ’90 studying teaching and their dad, Troy Davis ’86, attending for a semester before being called back to the family business.

Growing up in neighboring Gaston, Ore., the three women didn’t originally have their sights set on their parents’ alma mater. All three started college out of state, but after a year were ready to come home.

“Well, they didn’t have what we wanted,” Carmel explained. “Then we discovered that everything we wanted was 10 minutes from home.”

Three Degrees, No Separation

Breanne Davis ’16, OT ’19 completed a family hat trick on Aug. 10, when she became the third in a set of triplet sisters to earn a graduate degree from Pacific University.

Breanne earned her doctor of occupational therapy degree during the university’s August Commencement, which celebrated the achievements of more than 300 students in the College of Health Professions.

She was presented her degree by her sister, Carmel Nichol ’16, MSW ’17, who now works in Pacific’s Office of Graduate Admissions. Carmel also surprised their third sister, Autumn Davis MBA ’19, by presenting her degree in May.

“Our whole family is a Boxer family,” Carmel said.

Their parents also attended Pacific, with their mom Lea Mourich-Davis ’90 studying teaching and their dad, Troy Davis ’86, attending for a semester before being called back to the family business.

Growing up in neighboring Gaston, Ore., the three women didn’t originally have their sights set on their parents’ alma mater. All three started college out of state, but after a year were ready to come home.

“Well, they didn’t have what we wanted,” Carmel explained. “Then we discovered that everything we wanted was 10 minutes from home.”

Breanne and Carmel chose Pacific, studying exercise science and social work, respectively. After graduating in 2016, Carmel went on to the master of social work program at Pacific’s Eugene Campus, while Breanne entered the occupational therapy program at the Hillsboro Campus. Autumn joined the Boxer family for grad school, earning her MBA last spring.

“It’s like coming full circle,” Carmel said.
PATRICK MCKEETHEN ’76 was a four-year member of the Pacific track and field program, becoming the 1976 Northwest Conference champion in the 880-yard run. He went on to finish second at the NAIA District Championships and fourth at the 1976 NAIA National Championships in the 800-meter run, where he set a school record that still stands. McKeethen also ran the leadoff leg of a school record 4x400-meter relay that also still stands.

MIRANDA MCNEALY YANCY ’10 still holds five softball career records, including wins (59), complete games (55), shutouts (21), strikeouts (272) and innings pitched (472). In her career at Pacific, she pitched five one-hitters and two no-hitters en route to being a four-time all-Northwest Conference selection. As a senior, she was selected National Fastpitch Coaches Association (NFCA) All-West Region and the Pacific University Female Athlete of the Year.

GREG BRADLEY coached baseball at Pacific from 1996 to 2014. He was hired as an assistant baseball coach for Hall of Fame head coach Chuck Bafaro in 1990, became head coach prior to the 1996 season and served in that position until 2014. His teams recorded 328 wins, the third most among all Boxer coaches. His 2012 team won the Northwest Conference Championship, which was Pacific’s first baseball title since 1979.

J.P. Lowery OD ’93, MED ’96, has been inducted into the Oregon Lions Sight & Hearing Foundation Hall of Fame. He is a professor in the Pacific University College of Optometry. In addition to his teaching duties at Pacific, Lowery is currently chief of pediatrics for the Pacific EyeClinics. Lowery’s research interests include pediatric procedures, pediatric visual impairments, children with special needs and humanitarian vision care. He has served as director of the Oregon Lions Sight & Hearing Foundation Clinic since 1995.

Dr. Nada Lingel ’79, OD ’81, MS ’88, ’00 received the ninth annual Kamelia Massih Prize for a Distinguished Optometrist. Lingel is a Pacific University College of Optometry professor emerita and alumsna. She worked with the Virginia Garcia Memorial Health Center to develop a full-time, in-house eye clinic staffed by the university’s College of Optometry. She and her husband, fellow Pacific professor emeritus Dr. Dennis Smith OD ’79, established the Drs. Dennis L. Smith and Nada J. Lingel Award for Excellence in Systemic Disease.

Kwame Dawes was honored for his poetry by the judges of the prestigious Windham-Campbell Prizes. The judges applauded Dawes for his entire body of work, which includes 20 books of poetry and multiple other publications. They described him as “a daring virtuoso with a polywogic intelligence” Dawes, who was born in Ghana and grew up in Jamaica, is an instructor for Pacific’s Low-residency Masters of Fine Arts in Writing program and teaches full time at the University of Nebraska-Lincoln.

Amanda Stead, associate professor, College of Education, School of Communications Sciences and Disorders, had a very good spring. First, she was awarded President’s Award for Excellence in Graduate Teaching at the annual Faculty and Staff Honors and Awards Ceremony. Soon after, she was awarded the Dr. Thomas S. Thompson Distinguished Professorship in Education. Her project during a three-year distinguished professorship will focus on the emerging pedagogy around simulations and learning.

Heide Island, professor of psychology, has spent the past 10 months on Whidbey Island north of Seattle to continue extensive research she is conducting on the behavior of river otters. Her sabbatical research is the foundation for a five-year longitudinal study on Whidbey Island that will involve Pacific University students and local citizen scientists in the summer of 2020. She described river otters as an “indicator species,” signaling the ecological health in a habitat.

BON APPÉTIT | Pacific welcomed a new food service vendor to its Forest Grove and Hillsboro campuses this summer. Bon Appétit is lauded for its dedication to providing fresh, healthy, local fare for students and businesses all over the world. The dining hall in Forest Grove was updated as part of the transition, including the installation of a new pizza oven, and both the Hillsboro and Forest Grove markets got refreshes as well. Bon Appétit takes the concept of the Forest Grove Campus Starbucks, as well as catering at the university.

READ ALL ABOUT IT | The Forest Grove News-Times, the oldest continuously publishing newspaper in Washington County, Ore., recently moved its paper archive to Pacific University’s Tim & Cathy Tran Library in Forest Grove. The Pumpin’ Media Group-owned newspaper was downsizing its office but wanted to make sure that bound copies of its back issues — dating back more than 100 years and likely the only print archive existing — survived. The newspapers will be kept in the library’s archive-safe climate-control conditions, and the most sensitive copies will be placed in boxes for protection and they will be available on the library’s first floor for library patrons to view without appointment.

ON THE MAP | Pacific University and the Architectural Resources Group, which together produced a comprehensive report on the university’s historic buildings, was honored by the Forest Grove Historic Landmarks Board. “Not only is it an accurate accounting and a valuable resource for cataloging these precious historic resources,” the board said of the report. “It is written with care, concern, and compassion for the history of Forest Grove.” Campus buildings designated as Forest Grove landmarks range from Old College Hall, built in 1850, to McCormick Hall, built in 1924. More about the landmarks ➤ pacificu.edu/landmarks

SCRIPT YOUR FUTURE | Three students and two faculty members in Pacific’s School of Pharmacy received national recognition for their work in the Script Your Future campaign. Run by the National Consumers League in partnership with four pharmacy organizations, Script Your Future challenges teams to create campaigns that tackle issues of health disparity underrepresented community outreach, media/communications outreach, or interprofessional collaboration. Pacific’s pharmacy team partnered with the university’s School of Graduate Psychology, School of Audiology, School of Dental Hygiene, and College of Optometry, as well as local organizations, to promote adherence to prescribed medications through six local events and a continuing partnership at a local clinic. “The robust outreach the student teams conducted to promote medication adherence in their communities was not only impressive, but also highlighted the integral role the entire health professional team plays in achieving positive health outcomes,” said Sally Greenberg, executive director of the National Consumers League.
If it wasn’t for a hardy pioneer woman, Tabitha Brown, Pacific University might never have gotten off the ground in the mid-19th century. She was keenly interested in educating and caring for young people, and she was a partner in and contributor to the effort to start Tualatin Academy, which eventually became the university.

Since the beginning, Pacific has been a place where women could succeed, in one form or another. Pacific was one of the first colleges in the world to offer co-educational higher education.

As the university’s first president, Sidney Harper Marsh, told the Forest Grove Monthly in September 1868, “We believe it is best for both sexes that they should … be associated together. There is no sacrifice of anything valuable.” This was not a conventional view.

That doesn’t mean that the playing field has been level through the decades. In general, though, women who attended and taught at Pacific during the first part of its existence were given space to succeed, at least in comparison to the standards of the time.

What follows is a sampling of women who attended or taught at Pacific during its 170-year history. It is not meant to be a collection of the most influential or prominent women, but rather an anthology of some of the remarkable people who have spent a portion of their lives here.

Read about even more Pacific women, including Edna (Doar) Gehring ’70, MSEd ’72, Judy Sherman and others online. ➤ magazine.pacificu.edu

---

**Tabitha Brown**

**“THE MOTHER OF OREGON” — AND OF PACIFIC UNIVERSITY**

Tabitha Moffatt Brown was already an elderly woman when she came to the Oregon Territory in the late 1840s. She had been born in 1780 in Massachusetts, became a widow in 1817, then came with members of her family to the Oregon Territory, choosing to settle in the West Tualatin Plains, which she described as “the most beautiful of all” of the Oregon country. She started in the area near the age of 70 with virtually nothing, using her single Spanish picayune — about 1/16th of a dollar — to buy sewing supplies, bartering with the native Kalapuya for buckskin, then producing and selling gloves. In California, gold was discovered, and many left children in Oregon to chase riches. In 1848, Brown, along with missionary-settler Harvey L. Clark, started “the Orphan Asylum,” to look after those children as well as those orphaned along the Oregon Trail.

The next year, she, Clark and newly arrived educator Rev. George Atkinson helped establish the Tualatin Academy, a school that would educate the children on land donated by Clark. Brown contributed $500 to the project, agreeing to convert the Orphan Asylum she had established into Tualatin Academy.

The Tualatin Academy charter was the first granted by the Oregon Territorial government. When it was established, the academy’s charter included a desire to add a collegiate department as soon as possible. In 1850, Old College Hall was framed, and it opened the next year. College preparatory classes were held in the building under the name Tualatin Academy. Pacific University officially began offering college classes in 1854.

Tabitha Brown died in Salem in 1858 at the age of 78. In 1887, the Oregon Legislature designated her the “Mother of Oregon,” saying she “represents the distinctive pioneer heritage, and the charitable and compassionate nature, of Oregon’s people.”
Mary Richardson Walker

MISSIONARY AND MISSIONARIES’S WIFE, GIVER OF BOXER, AND FOREBEAR OF PIONEERING GRANDDAUGHTERS

In mid-19th century America, most married women were subordinate to their husbands. That’s why many of the early histories about the Tualatin Academy focus most sharply on the men who led their families into the mission field in the region: men like Henry Spalding, Cushing Eells, Elkanah and Mary Walker. Men’s day Walla Walla, Wash., led other missionaries in the entire way.

Mary Richardson Walker seems to have been a vigorous participant from the earliest days of what became Pacific University. She was born in Massachusetts in 1811, married Elkanah Walker in 1848 after a brief courtship, then traveled 3,000 miles to the Whitman Mission that spring and summer. She was pregnant on the journey and, according to accounts, forced to ride sidesaddle the entire way.

Her journal during this time contains this much-cited entry: “Rose about five. Had early breakfast. Got my house work done about nine. Baked six loaves of bread. Made a kettle of mush and have now suet pudding and beef boiling. I have managed to put my clothes away and set my house in order. At nine o’clock pm was delivered of a report from Elda & Leva Walker.”

The event that became known as the Whitman Massacre, in which 13 white missionaries were killed by members of the Cayuse tribe in 1847 near present-day Walla Walla, Wash., led other missionaries in the area, including Elkanah and Mary Walker, to relocate to the southwest. The Walkers went first to Oregon City, then to the Tualatin Plains, where they helped found Tualatin Academy, the forerunner of Pacific University.

“The Walker family moved to Oregon City in 1847 after the Whitman Massacre, which killed 13 white missionaries, including Mary Walker’s husband Elkanah.”

Mary Walker was present in 1850 when the frame was raised for the still-extant building we today call Old College Hall. It was, she noted tartly in her journal, “a splendid monument to the folly of someone.”

She died in December 1897, according to an account in the June 1899 issue of Oregon Native Son and Historical Magazine, which said “She was widely known as ‘Grandma Walker,’ and when her death took place ... the sad news was swiftly heralded all over the North Pacific coast.”

ELDA & LEVA WALKER

Mary Walker’s strength and resolve lived on in her family. Notable among her survivors were her granddaughters, Elda and Leva Walker, born in 1877 and 1878, respectively, who both graduated from Pacific in 1901.

They are believed to be the first women from Forest Grove to earn doctorates: Elda from the University of Nebraska and Leva from Cornell University, both in biology. Each taught botany at the University of Nebraska. A May 19, 1919, journal from the Nebraska Academy Sciences noted a report from Elda Walker on “The algal flora of some of the sandhill lakes,” and one by Leva Walker on “The development of Cyathus and Cruciibulum.”

Elda and Leva Walker lived together until their deaths in 1970 and 1971, respectively. Their teaching careers took them to the southeast, where the two had a common goal: to educate both men and women. They were both dedicated to the mission of Pacific University, which was founded in 1849 as a mission school for the Cayuse tribe.

They were also dedicated to the mission of education itself, and to the idea that women should have access to higher education. In the 1800s, women were often denied access to higher education, and those who did attend were often excluded from the curriculum. Elda and Leva were active in the women’s rights movement, and they were among the first women to graduate from Pacific University.

“Elda and Leva Walker were among the first women to graduate from Pacific University.”

They were both influential figures in the early history of Pacific University, and their contributions helped to shape the institution into the one we know today.

Mary Frances Farnham

TUALATIN ACADEMY PRINCIPAL, PACIFIC UNIVERSITY DEAN OF WOMEN

Mary Frances Farnham was an important bridge from Tualatin Academy, the original educational institution in Forest Grove, to Pacific University, which educated scholars of both genders from around the world. For a while they coexisted, but when Tualatin Academy closed in 1915, Farnham transitioned from principal of the Ladies Department at Tualatin Academy to become dean of women at Pacific, where she was an imposing presence until her retirement in 1924. She also was a professor of English and literature. While at Pacific, she also earned her doctorate in English literature from Mount Holyoke.

She had already accomplished much before coming to Pacific. She was a superintendent of schools in her native Maine and became principal of the Blooming School in what is now South Africa. You can still buy her books The Farnham Papers and Documentary History of the State of Maine, Vol. 8 on Amazon.

“Miss Farnham is a woman of the highest culture and refinement and the high social standard of our institution is due at least in a large measure to her influence.”

After several years, she married Walter Giersbach and settled with him in Portland. She was active in the Oregon Pioneer Association and published an article on rose culture, “being quite an experimenter with roses,” according to a contemporary account. She died in 1937 at the age of 88.

You can still buy her books The Farnham Papers and Documentary History of the State of Maine, Vol. 8 on Amazon.

“... A MIND AS SHARP AS A COPPER ETCHING.”

— WALTER GIERSBACH

At Pacific, she was a popular figure on campus. Pictures in the archives show her on picnics with students, always in good posture, with a kindly, sardonic smile. As the Faculty Yearbook put it, apparently around 1907, “Miss Farnham is a woman of the highest culture and refinement and the high social standard of our institution is due at least in a large measure to her influence.”

Other yearbook references through the years describe her as “ten o’clock extinguisher of Herrick Hall lights,” and “a jolly chaperone.” Even after retiring, she remained engaged in the life of the university, joining in the annual Christmas Wassail and writing a profile of many Pacific alumni.

When she died in 1943 at the age of 96, Pacific University President Walter Giersbach paid tribute by saying “there was hardly a matter touched by Mary Frances Farnham that did not show the handiwork of a lovely spirit, and a mind as sharp as a copper etching.”

Harriet Hoover Killin

FIRST WOMAN GRADUATE

In 1869, when the nation was just beginning to heal from the Civil War, Harriet Hoover Killin became the first woman to graduate from Pacific, joining two men to make up the university’s fifth graduating class. While she illustrates the university’s pioneering commitment to providing a college education to both men and women, her experience at Pacific was different from her male classmates. She attended classes alongside men, but she earned a “ladies degree” instead of the “scientific” or “classical” degrees awarded to men. And at the graduation ceremony, she was not permitted to speak to the audience, as male graduates were expected to do.

After she graduated, she taught school and in 1873, she married Benton Killin and settled with him in Portland. She was active in the Oregon Pioneer Association and published an article on rose culture, “being quite an experimenter with roses,” according to a contemporary account. She died in 1937 at the age of 88.
Andrewa Noble
ALUMNA, PROFESSOR & MATHEMATICS PIONEER

In her college days at Pacific in the late 1920s, Andrewa Noble was active in a range of activities, from debating on the proposition that “The modern woman is ephemeral” to serving as editor-in-chief of The Pacific Index. She also played volleyball and baseball, served as scholastic secretary for the Kappa Delta sorority, and was involved in the Drama Club.

After graduating, she went on to earn a PhD in mathematics in 1936 at the University of California, making her a rarity in that era. Her thesis was “On the Enumeration of Uniform Squares.”

She left again to join the faculty of Mills College in Oakland, Calif., and Chico State in Chico, Calif., before returning for the last time to Pacific, where she taught six years, becoming chair of the Math Department before retiring in 1965. She was also chair of the chemistry, physics and math section of the Northwest Scientific Association.

Bill Turner ’63 studied under Noble when he attended Pacific, and he calls her his “hero.”

“If you had questions,” he told Pacific magazine, “she always had office hours posted and she would be in her office all of those posted hours, whereas a lot of professors would post the hours and they wouldn’t be there. Dr. Noble was always there to help the students.”

“Also, on Tuesday nights, she would have tea at her house, like at 7 o’clock, right after dinner. If you had problems you could go over there anytime, you wouldn’t have to have an appointment or anything, she’d have sort of an open time with students and people could ask questions and sometimes the students would help each other.

“Even after I graduated, I came back and she was very interested in how her students were doing in life.”

Barbara (Williams) Crandall ’66, who went on to be an early software developer after studying math at Pacific, called Noble “a great advocate for her students.”

Noble died Nov. 21, 1993, in Placer County, Calif., at the age of 85.

Martha Rampton
HISTORY PROFESSOR, HEAD OF FEMINIST STUDIES, FOUNDER OF THE CENTER FOR GENDER EQUITY

When Dr. Martha Rampton arrived on Pacific’s campus as a history professor in 1994, female professors still were sometimes treated like secretaries, being asked, for example, to fetch coffee for their male colleagues.

A year later, Pacific had its first Feminist Studies program. And six years later, it had its first women’s center, which now is known as the Center for Gender Equity, or CGE. Neither would have happened when they did if not for Rampton.

The CGE, said Dr. Sarah Phillips, dean of Pacific’s College of Arts & Sciences, came into being because of Rampton’s “unbelievably endless devotion to it.”

Phillips said the center has not only helped attract students to Pacific, but it has given them the balance and support they needed when they were evaluating their places in the world and felt confused or alienated.

“It’s absolutely not an exaggeration to say that some students are alive today because of the Center for Gender Equity,” she said.

Rampton helped guide the university’s efforts to become a more diverse, more inclusive, more broad-minded place.

Now, she is turning it all over to the next generation as she and her husband step into retirement.

“It’s killing me,” she acknowledged in a conversation in a CGE meeting room in late July, her eyes filling. “It’s so hard to leave the students.”

Students are at the center of the CGE’s mission.

“I know how important it is to give students a place to talk, a place where they can push the envelope, where they can be outrageous,” Rampton said. “If not in college, when will they?”

This has meant, for example, students wearing penis-shaped suits, or massive strap-on breasts — initiatives intended to encourage screening for testicular and breast cancer, said Rampton.

The center started as a place devoted to women’s issues, but has expanded to cover orientations of all kinds, including bisexual, transgender, and lesbian and gay people. And it connects to the community, welcoming pre-college students and others from around the area.

The goal, Rampton said, has been to educate, not offend. And in the course of carving its own path, it has gained an international reputation. Rampton and Phillips said the CGE fields queries from around the world, asking for information or resources.

Of course, it took many like-minded people to help launch the era of gender equity at Pacific University — or, if not exactly like-minded, at least tolerant.

Pacific’s current president, Dr. Lesley Hallick, credits Rampton and the CGE for making the university an increasingly safe space for LGBTQ+ students.

“Some students have said, ‘I wouldn’t have stayed here if not for the CGE,’” Hallick said. “It has played an incredibly important role in supporting diverse students who are marginalized.”

Over the years, the center’s budget and staff of student workers have grown, and Rampton was allowed to reduce her teaching load so that she could continue to pour her energy into the CGE.

But there is one thing Rampton said she won’t miss.

In retirement, she said, “I’m not going to have to carry heavy boxes around.”

“I know how important it is to give students a place to talk, a place where they can push the envelope, where they can be outrageous. If not in college, when will they?”

— MARTHA RAMPTON

Male students have joined women for CGE-sponsored “Step in Her Shoes” events to call attention to the plague of sexual and domestic violence. At Rampton told the Forest Grove News-Times in 2014, “The CGE position is always that men and women are allies in working against social injustice.”
Anna Berliner

OBERVER, ANALYST, RESEARCHER, WRITER AND TEACHER

One of the most insightful thinkers and teachers ever to be employed at Pacific was Anna Berliner, a psychologist by title, but also an anthropologist, sociologist, optometrist and visual researcher.

“She made distinguished contributions to three different fields of knowledge and she reported them in three different languages,” noted M. Alpern, who delivered the first Anna Berliner Lecture at Pacific in 1978.

Born in 1888 in Halberstadt, Germany, Berliner lived a remarkable life. Her own typewritten CV covering the years up to 1946, which lists her student days at universities in Freiburg, Berlin, Leipzig, Tokyo, Berkeley, New York, and Columbus, Ohio, along with professional experiences in Newark, New York, Tokyo, Columbus, Maywood, Ill., includes this note: “Interruptions in the chronological list of professional work are due to two wars, a revolution, the Japanese earthquake and research work.”

Among the interruptions were deportation from Japan to the United States in 1914, when her husband was interned as an enemy alien, and fleeing Germany in 1936 as the Nazis increasingly restricted and threatened Jews.

Some of her most noted papers and lectures included studies of the Japanese tea culture, perceptual issues that affect results of Rorschach tests, the aesthetic judgments of schoolchildren, the distortion of straight and curved lines in geometrical fields, the “atmospheric influence” of fonts in advertising, and “the psychological field as determinant factor in vision.”

“She taught by her example, by discussing what she had read and by how she responded to one’s reply to her discussion. Her criticisms were always sharp and hard, though never unkind, but her standards were high.”

— M. ALPERN

Berliner was named a Lifetime Fellow of the International Council of Psychologists in 1963 and received the Apollo Award, a high honor from the American Optometric Association, in 1971.

She came to Pacific as an associate professor in psychology in 1949, the university’s centennial year. She became a full professor and dean of the department before retiring in 1963. After retiring, she taught German to schoolchildren in Forest Grove.

Shockingly, she was murdered in her Forest Grove home in 1977 by a Cornelius teenager who had been going door to door to collect money in a fundraising scam. It appears from accounts that emerged from the murder trial that Berliner refused to give him money and threatened to call the police. He went inside her house and beat and stabbed her to death. The teenager was convicted of murder in 1979 and sentenced to life in prison, though he was later released.

“Always she taught,” Alpern said. “She taught by her example, by discussing what she had read and by how she responded to one’s reply to her discussion. Her criticisms were always sharp and hard, though never unkind, but her standards were high.”

Berliner, who also served on the College of Optometry’s Faculty Committee, taught College of Optometry Professor Emeritus Willard “Wid” Bleything ’51, OD ’52, MS ’54.

Bleything brought a valuable perspective to the study of optometry. Bleything said. She didn’t teach about the biology of the eye, nor the craft of optics; rather, she focused on the study of visual perception, or how the brain understands and processes the images delivered by the eyes.

“We learned a ton,” said Bleything, who recalled the way Berliner’s mind sometimes raced faster than her accented English. She would speak rapidly in English, pause, mutter in German, then ask: “Eh?” to see if the students had understood. Often, said Bleything, they didn’t.

She and her husband sometimes joined students on a ski bus to Mount Hood, where they skied rings around the Americans. They were a classically European couple, he said.

Was she a pioneer?

“She didn’t know that, but she was,” Bleything said. “She stimulated a lot of good thinking about behavioral vision. She was a really good fit.”

Frances Clapp

MUSICIAN, TEACHER AND MISSIONARY

Frances Clapp ’08 — that is, 1908 — was a revered figure from the turn of the last century. She was a skilled pianist who appeared in many musical programs from the era, playing Chopin, Beethoven, Grieg, Rubenstein, Bach and other composers. Her playing was “splendid,” according to a letter to Pacific from Spanish maestro Alberto Jonas, under whom she studied for a year. Her senior thesis was titled “Early Church Hymns: The Latin Compositions up to the Middle Age.”

She was an energetic student, known for her musicianship and for her poetry, some of which was comic verse.

After graduating, Clapp taught music at Pacific for a year. And then she set sail for more distant ports. She spent a year in Germany, taught piano at Pomona College from 1912 to 1916, then was sent to Japan by the Missionary Board of the United Church of Christ in 1918. She was named to Pacific’s Missionary Service Roll around 1921.

Her desire always was to be a missionary, and she did it with her music, teaching in Japan through the first half of the 20th century. She was in Japan until war tensions arose, then went to Hawai’i, where she witnessed the attack on Pearl Harbor. According to materials for a 2012 exhibit of Japanese art and artifacts at the Petterson Museum of Intercultural Art, she was one of the first American civilians to return to Japan when the war ended.

She taught for 30 years in three sants at Doshisha College in Kyoto, retiring in 1957. She was presented to the empress and was awarded Japan’s Fifth Order of Sacred Treasure, a high distinction.

She was adventurous, she was committed, she was talented. She never married and lived her life as she wanted to; not the way others expected.

Born in 1887 in Indiana, she died in California in 1977 at age 89.
To the editor of The Oregon Statesman

County (Ore.) Juvenile Detention Center were and spending 15 years as executive director of the Oregon Prison Association. In that role, she visited prisons, lobbied public officials, sent letters and gave speeches. She campaigned successfully for the repeal of the death penalty in Oregon in 1964, drove the state to separate youthful offenders from adult criminals, and founded the Claire Argow Center.

She was the first female faculty member of the Oregon Historical Society, she told an interviewer in New York, “You don’t want to hear about it and I don’t want to talk about it.”

She earned her bachelor’s degree from Vassar in 1924, a master’s in psychiatric social work from Simmons College in 1925 and a law degree from Yale in 1930. She and the two other women in her class were the first three women to graduate from Yale Law School.

In a 1977 oral history online at the Oregon Historical Society, she explained that after attending law school and returning to what she called “psychological social work,” she was drawn to those who were convicted of crimes. “I found I could identify with criminals,” she told the interviewer. “I recognized how very human they are.”

An interviewer who spoke to her for Oregon Public Broadcasting’s “Front Line” program in 1983 asked her what she thought when people called her “a starry-eyed liberal do-gooder.” Replied Argow: “I’m proud of that title.”

“You don’t get rich when you do the kind of work I’ve done all my life, but you get a satisfaction. I have a gal who still writes to me, who came to us as a murderer in the penitentiary, who tells me that she could never have made it, in or out, if it hadn’t been for me. Now where do you get rewards like that?”

In 1991, she created the Claire Argow Endowed Scholarship Fund to support students planning a career in social services or law enforcement. Argow died in 1997, and her memorial was held in Pacific’s Old College Hall. Since her death, her son Keith has continued to generously support the scholarship fund, and he was inducted into the Pacific University President’s Circle this month.

She was the first female member of the City College School of Engineering, just at City College, but in the country, it was that way for much of the 20th century. Cecilie Froehlich

HOLOCAUST REFUGEE & PIONEERING ENGINEER

A 1942 headline in The Campus, the undergraduate newspaper of City College of New York, set the tone: “First Female Invades Tech School Faculty,” it blared. She was the first female faculty member of the City College School of Engineering, the first female department chair, not just at City College, but in the country, according to New York press accounts. And after a 23-year career at City College, she was lured to Pacific University, where university president M.A.F. Ritchie was looking for a new Math Department chair to succeed Andrew Noble (page 12). She led Pacific’s math department until retiring in 1970. A Jewish woman, she had fled from her native Germany as Nazism was taking hold. While her father and brother made their way to California, she fled to France, hiding and laboring on farms — an experience she acknowledged while telling an interviewer in New York, “You don’t want to hear about it and I don’t want to talk about it.”

Her prominence and her continuing experiences as the “first woman to …” made her an outspoken advocate for recruiting more women in the field. “In most instances,” she is quoted multiple times as saying, “no one bothers to tell female high school students about engineering careers. As a result, the girls frequently fail to elect adequate preparatory courses in mathematics and science. When they get to college, they find they don’t have the necessary qualifications to study engineering.”

At the same time, she bemoaned the lack of career opportunities for female engineers. She wrote to Eleanor Roosevelt, saying the United States could address its much-discussed shortage of engineering talent by bringing more women into the field, a subject Roosevelt discussed on the radio. And as for the companies that employed engineers, Froehlich said, most hired women only as assistants.

“We are not an inferior breed,” she told a reporter for the New York Herald-Tribune. “We don’t want to be secretaries. We want the same job for the same ability.” — Cecilie Froehlich

She died in Forest Grove in 1992, just short of her 92nd birthday. She gave generously to Pacific, and upon her death, her estate — along with friends and alumni — created the Cecilie Froehlich Memorial Endowed Scholarship Fund to support deserving math and science students.
Varina French
ALUMNA, COACH AND PT FOUNDER

Even if she had done nothing else at Pacific, Varina Heinrich French ’56, MS ’65 would have been remembered for her 17 years spent coaching women’s volleyball, softball, track and field and gymnastics, and for becoming the first female physical education department chair in the West. Beyond the university, she was a prominent advocate for the sport of gymnastics and played a national role in certifying gymnastics judges. She was a spotter for ABC’s television coverage of the 1984 Olympics in Los Angeles, spending hours in close proximity to the finest gymnasts in the world, including Mary Lou Retton, who won the gold in the all-around.

“I got so excited watching,” French told Pacific magazine in 2004. “When Mary Lou Retton threw that 10 vault, that was something else.” In 1974, she was elected vice president of the U.S. Gymnastics Federation Women’s Committee and continued to play a prominent role in the sport, even after retiring from Pacific. She worked international gymnastics meets and became international media coordinator for the federation.

“She was a pioneer,” said longtime Pacific Athletic Department leader Judy Sherman, another of Pacific’s notable women (see magazine. pacificu.edu). “She was an advocate for women in sport and women in education.” French had “lots of energy” and was very forward-thinking. Sadly, French’s gymnastics career ended 10 years after the Los Angeles Olympics, when she was severely injured in a traffic accident that put her in a coma. When she awakened, she suffered memory loss and other impairments.

Varina French and her husband Dan were both inducted into the Pacific Athletic Hall of Fame; she as a coach and educator, he as a standout athlete in the 1950s, men’s basketball coach and athletic director. She was honored with the Outstanding Alumna Service Award in 1986. She died this spring; Dan French died in 2012.

AN EDUCATIONAL LEGACY

French made another, longer-lasting contribution to Pacific — one that influences the university’s direction to this day and into the future. Her interest in athletics, and helping athletes recover from sports injuries, led her to help set in motion a plan to create a new school to train physical therapists. In the early 1970s, she, along with David Malcolm, PhD, then-dean of the College of Arts & Sciences, started planning for the program with the cooperation of the Oregon Physical Therapy Association.

The school was launched in 1975, a time when Oregon had no other programs to train physical therapists.

Dr. Jean Baldwin

Heading the new program was Jean Baldwin, a physical therapist and PhD, who steered the program through its fledgling years. She oversaw the arrival of the first 16 physical therapy students in the fall of 1975 and their graduation two years later. Baldwin retired in 1984. The next year, the program was redesigned to confer a master’s degree following three years of undergraduate study and three years of professional work. And in 2000, Pacific became one of just 14 accredited physical therapy educational programs to offer the doctor of physical therapy degree.

Baldwin died in Idaho in 2010. The Dr. Jean Baldwin Physical Therapy Endowed Scholarship Fund was created in her memory in 2014 by a group of alumni to support students studying physical therapy.

The School of Physical Therapy became one of the initial members of Pacific’s College of Health Professions, now located in Hillsboro. And last year, the school changed its name to the School of Physical Therapy and Athletic Training, reflecting its growing master’s program in athletic training.

Lillian Kurahara & Yukie Katayama Sumoge

JAPANESE-AMERICAN STUDENTS INTERNED DURING WORLD WAR II

Neither Lillian Kurahara nor Yukie Katayama Sumoge cut a wide swath when they were students in Forest Grove in the early 1940s. But, in 2007 they were awarded honorary degrees by the university because of the circumstances around their departures in 1942.

When President Franklin Roosevelt issued Executive Order 9066, which provided for secure military areas where Japanese-Americans were to be sequestered following the Dec. 7, 1941, attack on Pearl Harbor, notices went out calling for “all Japanese persons” to report to civil authorities.

Sumoge’s family, who lived in Portland, Ore., and Kurahara’s, who farmed fruit orchards in Hood River, Ore., were sent on trains to assembly centers, then to a detention center in Tule Lake, Calif. University records suggest that another student, Saka Yoneyama Noma, was also interned, but post-college records for her could not be found.

Kurahara, who still lives in Hood River at age 96, said her sophomore year at Pacific began promisingly. She was majoring in chemistry.

“It was such a wonderful start to the year,” she said. Her chemistry classes were taught by a Dr. Jones, and she chose her to be his assistant. Then came Roosevelt’s order, and her family called her home.

“I was thinking everything was wonderful, then kaboom,” she said.

Three days after the Kuraharas were shipped on a crowded train to the assembly center in Pineadel, Calif., her mother died. The rest of the family continued on to Tule Lake.

“I was thinking everything was wonderful, then kaboom.” — LILLIAN KURAHARA

Nevertheless, Kurahara says she is not bitter, and she was concerned that this article would “glorify” her as a victim. She said her family was luckier than many. Their orchards were looked after by kindly neighbors, and the family was able to return to them later. The belongings they left behind suffered some breakage and loss, but she noted she also met the man she married during her detention. He was also interned at Tule Lake.

The war interrupted college for both Kurahara and Sumoge, who hoped to follow Madeline Yamane Bose, the first Japanese-American woman to graduate from Pacific, in 1941. She had a “lovely singing voice,” Kurahara said.

Kurahara was unable to attend the 2007 Commencement ceremony in which she and Sumoge were awarded honorary bachelor’s degrees, but Sumoge was there. “There’s no way I can express my gratitude and appreciation and pride that Pacific has honored me,” Sumoge said at the time.

“I have no words to explain it. It was certainly the fulfillment of a dream.”

Kurahara said she was grateful, too. She said she encountered a great deal of kindness along the way, including gifts of furniture and books from her sisters in Kappa Delta Sorority. Nobody was angry with her, personally, she said.

“You couldn’t be bitter,” she said this summer. “Life is too short to bear grudges.”

But, she added, “I hope it doesn’t happen again.”

“I was thinking everything was wonderful, then kaboom.” — LILLIAN KURAHARA
Perhaps the most prominent improvement on the Forest Grove Campus this summer is the new Boxer Makerspace, where students will be able to use advanced equipment to design and build projects of their own. The glassed-in space on the second floor of the Tim & Cathy Tran Library includes open work areas and meeting rooms.

**BOXER MAKERSPACE**

**BY MIKE FRANCIS**

**MAYKU FORMBOX VACUUM FORMER**
If you have a solid object, including those you created on 3D printers like the ones in the Boxer Makerspace, the FormBox lets you mold a thin shell of plastic around it. It creates molds for anything pourable — such as chocolate, or soap — as well as making shells for masks, miniature cars and other objects.

**EINSCAN-PRO 3D SCANNER**
For scanning larger objects, such as a human arm or leg, the EinScan-Pro captures data that can be converted into a digital 3D model. It works with all popular CAD and 3D modeling and printing software.

**SQUINK MULTILAYER CIRCUIT BOARD PRINTER**
Students can use the printer to build printed circuit boards with multiple layers, using conductive or insulating inks, conductive glues and placing surface-mount components. If a student imagines an electronic device, the printer can create a prototype.

**1891 GOLDING PEARL LETTERPRESS**
This vintage letterpress was gifted to Pacific by a local business in the 1960s. It has been relocated several times, repaired, and is now ready to use for letterpress printing, one sheet and one color at a time.

**WASH & CURE**
Works in tandem with the 3D printers

**GLOWFORGE LASER CUTTER & ENGRAVER**
The Glowforge can cut or engrave a variety of materials including leather, wood, acrylic, glass. It can be used to make stencils, patterns, jewelry, letterpress blocks and other objects.

**FORMLABS 3D PRINTERS**
The Boxer Makerspace contains three machines used in printing three-dimension objects.

- A resin-based 3D printer makes models created in Sketchup, Fusion, Tinkercad or any other 3D modeling software.
- The Wash & Cure machine cleans and readies printed forms for use.
- The Autodesk Ember resin printer is suited for building tiny, intricate objects, such as jewelry.

Rick Hill ’70 and his wife, Joyce, traveled from their home in Helena, Mont., this summer to visit Pacific’s Forest Grove Campus for the first time since he graduated. He holds the longest standing track and field record on the board at the Stoller Center—a 53-foot, three-and-a-half-inch shot put he achieved in a 1969 meet. Hill, a retired school superintendent, said he checked the Boxer website for a few years because he was curious if his record was still standing. When he hit the 50-year mark, he and his wife parked the car and drove to Forest Grove for what he called “a one-man celebration.” He is glad to still be the record holder, he said, “but it confuses me. Athletics today are so much bigger and stronger,” he said. He would have assumed someone on Pacific’s team would have surpassed him by now. “Records are made to be broken,” he said.

Edward Kame’enui ’70 retired in August 2018 from the University of Oregon, where he was Dean-Knight professor in the College of Education, as well as the founder of the Center on Teaching and Learning. Before teaching in Eugene, he taught at Purdue University and the University of Montana; co-wrote 20 college textbooks; published more than 200 articles including 100 refereed research publications and 50 book chapters; directed more than $80 million of federal and private research grants; worked for the U.S. Department of Education; and spoke at the White House. He also served on the original advisory boards for children’s television shows between the Lions and WETA’s Reading Rocks.

1971

Lea (Wardell) Blackwood ’71 was presented with the Albert Nelson Marquis Lifetime Achievement Award in January 2019 by Marquis Who’s, the publisher of Who’s Who in America. For her contributions to the teaching and counseling professions, she was named an Outstanding Alumni by the Department of Psychology’s Special Recognition Award for Excellence in Elementary Mathematics Teaching by the state of Colorado, the Outstanding Teacher of the Year Award by the Longmont Chapter of Community College Directors and a Sustained Superior Service Award from the U.S. Army in Frankfurt.

1978

Lore Cordain ’78 was featured on the “Primal Blueprint” podcast. He has been featured on Dateline NBC, the Wall Street Journal and the New York Times as an expert on the evolutionary basis of diet and disease. He has written several books and more than 100 peer-reviewed scientific articles and abstracts. He is a professor in the department of health and exercise sciences at Colorado State University from 1982 to 2013.

1979

The Class of 1979 will celebrate its 45-year reunion in 2022. Contact the Alumni Association at alumni@pacificu.edu or 503-352-2057 to start planning your reunion.

1983

Frank Giardina ’83, OD ’86 is the program director of Community Health Centers of the Central Coast. He also became the first certified optometrist in California to administer vaccinations.

1985

The Class of 1985 will celebrate its 35-year reunion in 2020. Contact the Alumni Association at alumni@pacificu.edu or 503-352-2057 to start planning your reunion.

1988

Karko Fox ’88 has co-authored a new novel, Seconds Café. The book is intended to be part of a start-up launching businesses that raise money to support foster care programs, homelessness and adoptions.

1998

Deedra (Trentman) Mason ’95 was featured in the Dr. Oz’s podcast series discussing the role genetics play in health. She is a naturopathic physician with lectures around the world on weight loss, health and beauty, and nutrigenomics. She is the director of clinical education and research for nutraMetrix Custom Health Solutions, an organization that offers science-based supplementation and health programs.

1996

Guy Dakahahi ’96, MAT ’04 was hired by Forest Grove High School as its wrestling coach after coaching for Hillsboro’s Century High School. While in Hillsboro, he earned his tenure at Century, his teams produced multiple individual and team champions. He is in Pacific’s Athletic Hall of Fame and was a two-year NAIA All-American in the heavyweight wrestling class. He had a career record of 67-24. He will also teach physical education at Forest Grove.

1997

Bede (Lefure) Murphy ’98, MS ’98, is a family therapy and prevention specialist. Bede has been with the Dufief Family Center since 2001. She is the author of the new non-fiction book, Sisters Coffeehouse, a café in Sisters, Ore., inspired by Swedish coffee culture. She was trained at Limmari College, a family-run business in Bradford, England, and she also spent time in Sweden before settling back in Oregon to open her own shop. In the past, she has taught at Sisters Christian Academy in Sisters, Ore., and Forest Hills Lutheran Middle School in Forest Grove.

2001

Katie Shieldel Felix ’01 has finished her 17-year career with the Hispanic Heritage Foundation for Tacoma Public Schools, where she has been recognized by Microsoft as a Microsoft Innovative Educator and a Skype Master Teacher. She has presented at the annual conference of the National Council for Computer Education, and she has worked with Microsoft products with her students. She and her husband, Robert Felix ’98, MAT ’01, reside in Tacoma with their two children.

2002

Michael Gable MSF ’02, DPT ’03 is the author of Beyond Tape: The Guide to Climbing Injury Prevention and Prevention, which was recently featured in Rock and Ice and a magazine devoted to rock and ice climbing and mountainaineering. He runs his own private practice, Eastern Sierra Physical Therapy Health and Wellness, in Bishop, Calif.

2003

Kelly Carmody MAT ’03 is the recipient of the 2019-2020 Bob Stack Excellence in Teaching Award. She teaches sixth grade at Wooster Wilson Elementary School in Manhattan, Kan., and has been with the district for eight years.
Rob Hesia ‘03, MAT ’04 was selected as the coach of the year by the Hawai‘i Wrestling Coaches Association. He coaches the boys and girls teams at the Kamehameha Schools Honolulu campus. He led the Warriors to state team titles for both the boys and the girls, the first state sweep by a single school in four years. Hesia is the second Pacific alumnus coaching at Kamehameha to be honored as the state’s wrestling coach of the year.

Allison (Osterberg-Delia) Huffman ‘03 and Isaac Huffman ‘03 live in Mount Vernon, Wash. Allison Huffman runs a couple’s therapy practice in Bellingham, Wash. Isaac is the library director at the Mount Vernon Library. They have three children: Elliot, Emmala, and Eliza.

Anahita (Nemat) Rennier ‘03 and husband, Christopher, welcomed their son, Christopher Waldo Rennier, on March 9, 2019.

2004
Sarah Brown Cowan MAT ’04 was featured in KATU-TV’s “Leaders in Learning,” a series that recognizes exceptional teachers. She has taught at North Salem (Ore.) High School for 15 years and undertook a new role this past year in the school’s pilot program that helps at-risk students graduate on time. The goal of the program was to increase the graduation rate by 10 percent in four years and it was achieved in just one year. She now has 2.3 freshmen under her wing.

Amanda Paschall ‘04 and Tadrick Ferguson welcomed their first baby, Sadie Faith Ferguson, on April 26, 2019.

2005
The Class of 2005 will celebrate its 15-year reunion in 2020. Contact the Alumni Association at alumni@pacificu.edu or 503-352-2057 to start planning your reunion today!

Paul Gutierrez MAT ’05 was selected to be the next principal of Methow Valley Elementary School in Winthrop, Wash. He has been assistant principal at Mount Baker High School in Deming, Wash., and was previously the dean of students at Wade King Elementary School in Bellingham, Wash.

Andretta (Journey) Schallingue ’05 published her most recent book, The Men Beyond the Stones, a look into the lives of the 14 service members who are immortalized at the Maryhill Stonehenge in Goldendale, Wash. She is also the author of From Knights to Skulls: The Cultural Evolution of Nose Artwork and Aircraft Nose Art: American, French and British Imagery and Its Influences from World War I through the Vietnam War. She lives near the Columbia Gorge in Oregon with her husband, daughter and pets.

2006
Steve Abang ‘06 and Amy (Fenton) Abang ‘08 welcomed son Elijah Michael Abang on Oct. 5, 2018.

Loren Bullard ‘06 and Colin Hosking ‘06, both of Honolulu, were married on April 27, 2019, at the Koko Kai YWCA in Kāne‘ohe, Hawai‘i. In attendance were fellow Boxer alumni Richard Guerreo ‘04, Donald Guyer ‘05, Nicole Goodrich Guyer ‘05, Michael Lee ‘05, Cheryl Inouye Lee ‘05, Jake Lovell ‘06, and Dan O’Malley ‘06.

Angela Mart OT ‘07 ‘06 has worked at Wallowa Memorial Hospital in Enterprise, Ore., as an occupational therapist for the last three years. She helped establish the hospital’s first ever occupational therapy program and is currently working to add a pediatric program.

2008
Benjamin Elliott ‘08 and his wife, Michelle, moved to Bellevue, Wash. He has started a new job as a software engineer at Amazon, where he works on the Last Mile Team, which develops ways to optimize deliveries. They are accompanied by their cat, Hazel.

Samantha Frank MFA ’08 was selected for an artist’s residency at Mineral (Wash.) School. Her work has appeared in Grow Northwest Magazine. Ms. Magazine, Yes!, and Cotton Xenomorph. She is at work on her first novel, Speaking Rabbit, set in 1916 Everett, Wash.

Caitlyn Tateishi ‘08 is a 2010 Olympics marathon trials qualifier. She runs marathons regularly, placing first in both the Hilo to Volcano 50k run and the Baltimore Marathon in 2016. She ran cross country and track at Pacific, but took a break when she taught English in Japan through the JET program. After Japan, she lived in Zambia as a Peace Corp volunteer where she began running again. When she is not running, she is either working as a legal operations business analyst or exploring the outdoors with her husband and dog.

2009
Alissa (Nielsen) Hattman MFA ’09 was recently selected in The Elphrastic Review, an online journal, for her poem “Where Do You Go?” She has written five books and her work has appeared in numerous local and national journals. She gives tours in French and English at the Memorial Art Gallery in Rochester, N.Y., and offers weekly poetry appreciation courses at the local public library.

Abby Murray MFA ’09 was chosen by the Tacoma (Wash.) Arts Commission as the city’s Poet Laureate of 2019 to 2021. Over the next two years, she will participate in and host public poetry readings, workshops and other community events to advance the literary arts in Tacoma. She won the 2019 Perugia Press Prize for her debut poetry collection, Mail and panell, forthcoming in September 2019. She also edits Collateral, a literary journal focused on the impact of violent conflict and military service.

2013

Alicia Tennes '70, editor in chief of Reed College's literary journal, The Sycamore Review, in 1969, began working at Pacific. She was featured in a recent column about a medical researcher and a guided missile destroyer that patrols the Mediterranean and Baltic seas.
in memoriam

in 2009. She was the first female member of Duke’s Student Council. She is survived by three children, Ben Reynolds, Deborah Jackson and Rebecca Newton; and by six grandchildren.

Elsie P. Van Smith ’19 died May 6, 2019. From the age of 4, she took dance, eventually focusing on adagio. She excelled in school and left for Pacific University at the age of 17. There, she met the love of her life, Bernard Smith ’19, a bass fiddle player and avid bridge player, a game that he taught her and that they shared a love of throughout their marriage. Within three months of meeting, they were engaged and shared an adventurous life together, living as far north as Alaska and as far east as New Jersey. She was a loved and loving mother to Robin J. Smith, Jeannie A. Limpahan, Laura L. Staffa, and Rosana H. Glenn. She will also be missed by her eight grandchildren and seven great-grandchildren.

1952
Dr. Donald Behrends ’52 of Vancouver, Wash., passed away on March 21, 2019, at the age of 94. He was born on June 22, 1924 in Kieselville, Iowa, the youngest of eight children. In 1943, at the age of 19, Don joined the Army and served in the infantry in Europe in WWII. While stationed at Camp Adair, Ore., he met Jean Jones and they were married in 1946 in Salem, Ore., on their tour of duty. From there, he attended Pacific University and obtained his doctor of optometry degree. In 1954, he opened his solo optometric practice on Evergreen Boulevard in Vancouver, where he practiced for 30 years, working an additional 10 years after selling his practice. Behrends was very active in the Vancouver Lions Club for more than 40 years. He loved hunting and was a member of Clark Rifle Range Club for many years. He is survived by his son, Dennis Behrends; daughter, Becky and Rick Morcom; and grandchildren, Brannie and Alex Behrends and Samantha and James Morcom. He was preceded in death by his wife, Jean Behrends in October 2017, after 71 years of marriage.

1959
Robert George Davidson ’59 died peacefully at home in Prescott, Ariz., on April 28, 2019. He was born in Loma Linda, Calif., in 1935, grew up in Alhambra, Calif., and graduated from Pacific University in 1959. He continued his education at Claremont School of Theology, where he earned a master’s degree in theology. He was ordained in the Congregational Church which later became the United Church of Christ. He served UCC churches in Riverside, Calif., Wellesley, Mass., Appleton, Wis., and Lakewood, Ohio. He decided to leave the ministry and become a publishing executive, forming Educational Ministries, Inc. (now EMI PrintWorks), which published Christian education materials for mainline Protestant churches for 35 years. He also published two monthly publications, Church Educator and Church Worship for many years. He leaves behind his wife of 52 years, Linda; his two children, Mark Davidson and Cheryl Uresti; and his granddaughter.

1960
Jennifer (Kommann) Wollman ’60 died March 15, 2019, at age 80, surrounded by her family. She attended Pacific, where she met her future husband, Elias Wollman ’52, OD ’58, who was an optometry student at the time. They married and raised three children together, settling in Fort Bragg, Calif. She owned and operated The Bookstore on Redwood Avenue for 30 years while her husband operated a local optometry practice. She was a hardworking gardener and naturalist, world-class cook and loving mother, spouse, and friend. She was preceded in death by her brother, John. She is survived by her children, Aaron, Melinda Posner, and Sonia; two grandchildren; siblings, Richard, Jim, Frances, Mary, and Lianne; and life partner, Tom Quinn.

1962
Riek Horn ’62 died Feb. 10, 2019, at age 79, surrounded by his family. He was born in Eugene, Ore., and grew up on the family farm. He attended Lewis & Clark College in Portland, Ore., before transferring to and graduating from Pacific. He pursued his graduate studies in biology at the University of Arizona. He worked summers at Crater Lake National Park in southern Oregon, where he met his wife, Beth. He was a biology teacher at Hepner (Ore.) High School, forest biologist for the Mount Hood National Forest, regional wildlife biologist in Portland, national threatened and endangered species coordinator in Washington D.C., and regional director of wildlife and fisheries in Missoula, Mont. He and Beth retired in 1999, and spent their time hiking, camping, fishing and doing other outdoor activities together. Even after retirement, he served as president of the board of directors of the Grizzly & Wolf Discovery Center at Yellowstone. Most. He is survived by his wife of 50 years, Beth; daughter, Frances Malcolm (and Greg) Chernesky; and two grandsons.

1972
Willard Henry “Hank” Butzlafl ’72 died May 1, 2019, at age 84. After graduating high school in Wolf Point, Mont., he attended Pacific University for three years. He married in 1956. For the next 13 years, he worked for the Montana State Highway Department. He packed up his family and moved to Forest Grove to finish school. He earned his bachelor’s degree in biology a couple of years later, and then returned to work for the Highway Department in Helena, Mont. He retired in 1994 as supervisor of the Safety Division. He spent his retirement doing what he loved, golfing, sailing and traveling, visiting almost every country in the world. He is survived by his daughter Deborah and sons Michael (and Colisi), Ronald, and Dennis; three grandchildren and their spouses; five great-grandchildren; and former wife Thelma.

1993
Janet Hopkins PsyD ’93 died Feb. 28, 2019, at age 69. After graduating from Pacific, she dedicated the following 24 years of her life to serving her patients as a member of Swedish Family Medicine in Seattle. She eventually became a sole practitioner in West Seattle until her retirement in August 2018. One of her greatest accomplishments was her tireless advocacy of her son, Ben, as she confronted physical challenges during his last months. She is survived by her son, Benjamin Hopkins Farns. —

HOMECOMING OCT. 18-20, 2019
We can’t wait to welcome you home. It’s time to make plans to return to campus Oct. 18-20 and tell your friends to do the same. This fun-packed weekend will include reunions for classes ending in -4 and -9, lectures, sporting events, campus tours and more. pacific.edu/homecoming
WE BELIEVE IT IS BEST FOR BOTH SEXES THAT THEY SHOULD ... BE ASSOCIATED TOGETHER. THERE IS NO SACRIFICE OF ANYTHING VALUABLE.”
