Yuma is located 2.5 hours from Phoenix and 2.5 hours from San Diego. Surrounded by small mountains, we are close enough to ski slopes for a weekend trip. We have sand dunes for recreational sports (they are the dunes in Star Wars and Space Balls). We are minutes from Mexico. Yuma is the 3rd fastest growing city in the US and recently rated the 3rd most desirable place to live in the country.

We hold the record for the most recorded hours of sunshine in a year, in the world! Summers are definitely warm, but with the low humidity and close proximity to water sports at the Colorado River, we stay nice and cool. The winter here is beautiful. No coats required and outdoor activities are a must.
