

## DISABILITIES STUDIES

**Nancy Cicirello, Ramona Ilea, Christine Macfarlane, Marc Marengo, Jessica Ritter, Todd Schultz, Tim Thompson**

Disability is a natural part of the human experience but despite its universality, societies past and present have treated the physically or mentally different with fear and antipathy. (The Nazi gas chambers, for example, were first constructed to eradicate persons with mental disabilities.)

Disability Studies from the perspectives of the humanities tries to understand why people with disabilities have been treated as they have and how they should be treated in a twenty-first century democracy like our own, and why.

This minor is designed for students majoring in any of the liberal arts and sciences. For those interested in health care, disability studies complements their science courses by focusing on the social, cultural, and political issues in their future careers, and by concentrating on a population of people that many professions - physical therapy, education, medicine, and psychology, for example - are established to serve.

Students majoring in the social sciences or humanities will be interested in disability studies' analysis of the most fundamental ideas of our culture: body and mind, normality and difference, freedom and rights, beauty and wholeness - all of these "abstractions" and their profound importance may become clearer in classes devoted to exploring their impact on our laws, schools, hospitals, beliefs, and day-to-day lives.

### Program Learning Outcomes

Students completing the Disability Studies Minor will be able to :

- demonstrate historical knowledge of how disability has been perceived and treated
- analyze how social and cultural representations of disability have effected its perception in the past and present
- discuss the major issues facing people with disabilities today
- work with people with disabilities comfortably and respectfully.

## COURSES

### DS-200 Introduction to Disability Studies

Disability Studies understands disability as referring not only to a biological or medical condition, but also to a community of people (the largest minority in the U.S.); to a civil rights movement; to a complex set of social and ethical issues; to a universal human experience; and to the ways cultures respond to different bodies, minds, and behaviors. The class will help students understand disability in its social, cultural, and ethical dimensions. It will sometimes be taught in Hawaii during Winter. Counts toward core requirement: Diverse Perspectives. Students who have successfully completed ENGW 202: Writing About Disability should not take this course. 2 credits.

### DS-204 Working w/People w/Disability

Combines theory and practice to strengthen student understanding of the everyday lives of people with disabilities. Time is divided between classroom learning and working directly with kids, teens, and young adults in the larger community. Students choose among a variety of activities, including summer camping on Mt Hood; playing or coaching with Unified Sports of Forest Grove; mentoring recent high school graduates transitioning to adulthood, and more. Though supported by qualified faculty and staff, students have extensive opportunities to be with and learn from members of the disability community. Prerequisite: DS 204L. Counts toward core requirement: Civic Engagement. 4 credits.

### DS-204L Working w/People w/Disabilities Lab

This course is the experiential lab component of DS 204. DS 204L is a prerequisite for DS 204. Pass/No Pass. 0 credits.

### DS-211 Abnormal Psychology

Students critically explore major categories of disorders, with special emphasis on dissociative identity disorder, depression, schizophrenia, and borderline personality. Questions are raised about the use of psychiatric drugs, and attention is paid to the history of insanity. This course includes both textbook and original readings. Also listed as PSY 211. Prerequisite: PSY-150 with a minimum grade of C. 4 credits.

**DS-275 Internship**

See department for details. Internship contract required. 1-4 credits.

**DS-307 Ethics, Medicine & Health Care**

A study of ethical issues that arise in the health care professions. After working through the processes of moral reasoning and learning about some of the major moral theories this course will focus on major topics in health care today. Typically this course deals with such issues as abortion, physician assisted suicide, genetic manipulation and cloning, and comparative health delivery systems. Students will be able to do some independent research on a topic of their choice. Also listed as PHIL 307. Prerequisite: Sophomore standing or above (30 or more completed credits). 4 credits.

**DS-325 Constitutional Law**

An introduction to the judicial process, legal reasoning and interpretation of the Constitution through analysis of court cases. Subjects include federalism, property, race, gender, and privacy. Also listed as POLS 325. Biennially. 4 credits.
