Dear Administrator/Director of Low Vision at Schools of Optometry:

Eschenbach, a leading manufacturer of high quality magnification solutions, is pleased to continue offering the **Eschenbach Low Vision Student Award in 2017!**

This award is designed to recognize the skills and achievements of one 4th year student who has shown an exceptional aptitude and interest in the field of low vision. The recipient will be chosen by your school of optometry using a selection process of your choice.

Eschenbach recognizes the importance of educating optometry students about the field of low vision and how they, as future low vision practitioners, can help improve the quality of life for those who are visually impaired. We hope this award will encourage your honored student to offer low vision care upon completion of their studies, and also to increase awareness of the field of low vision at schools of optometry.

If your school is interested in participating in this program, please let us know the name of the student you have chosen to win this award once the selection is made. When we have received the name of the student, an Award Certificate and Award Letter will be sent to your attention to deliver to the award winner. The Award Letter will recognize the winner’s achievement and entitle him/her to receive a complimentary SmartLux Digital Hand-held Video Magnifier from Eschenbach Optik of America, Inc., one of the top selling portable video devices on the market.

Also, be sure to ask your local Territory Manager about the free in-services they can provide at your school to help educate your students about the newest low vision solutions available!

Thank you,

Jillian Camarata  
Marketing Communications Manager
