BUILD YOUR OWN HEALTHCARE PRACTICE

CONTINUING INTERPROFESSIONAL EDUCATION SERIES*
Simultaneously Video Conferenced in Hillsboro and Honolulu

Financial Accounting for the Small Healthcare Business Owner |
Bookkeeping for people who don’t have the time, don’t want to spend the time, and find bookkeeping boring.

This presentation is designed to give the new healthcare business owner an overview of the financial end of a small business. Your approach to your business will focus first on giving good care to your customers, taking care of your staff, and hopefully making some money. We will take an accountant’s approach and talk about your business “by the numbers”. We will discuss how your clinical decisions affect the income and expenses of your business by looking at the various categories that are on an income statement. We will talk about budgeting, financial statements, internal controls, and making business decisions.

By the end of this presentation, participants will be able to:
- Create a list of financial tasks needed to start a new business
- Read and understand a balance sheet and income statement.
- Develop a 12 month budget of income and expenses.
- List appropriate internal controls for a small business.

JOHN DAHLQUIST | CPA, CMPE
Clinic Administrator | Maple Street Clinic

*Series designed so that participants attend the sessions that are the right fit. No previous attendance required.
