Collaborating for Student Success After Traumatic Brain Injury

This course is appropriate for middle, high school and college level teachers, counselors, athletic trainers, healthcare providers and others who collaborate to promote student success in the classroom during recovery.

At the end of this presentation, participants will be able to:
- Apply results of cognitive-linguistic testing to academic plans
- Correlate results of cognitive testing with modifications in the classroom
- Collaborate development of 504 or Individualized Education Plans
- Use of “Return to Learn” guidelines to inform teachers of student status
- Demonstrate effective communication with/between healthcare, school, student & family members
- Oversee the return to sport progression by the Athletic Trainer, including challenges
- Develop Classroom accommodations from medical recommendations
- Communicate medical recommendations for return to classroom & return to play
- Examine the psychological effect of TBI on social relationships
- Predict changes in how students self-identify after a TBI
- Assess the family experience in the trauma and recovery of the student
- Debate interventions to assist family and student in recovery
- Differentiate between baseline, post injury and periodic testing results
- Compare return to play progression with academic tolerance at different stages of recovery
- Illustrate role of the neuro-cognitive testing in Return to Play status
- Apply new knowledge to case studies

This program has been reviewed and is approved for a maximum of 6.00 hours of AAPA Category 1 CME credit by the Physician Assistant Review Panel. Physician assistants should claim only those hours actually spent participating in the CME activity. This program was planned in accordance with AAPA’s CME Standards for Live Programs and for Commercial Support of Live Programs. Course submitted to Oregon Board of Natural Medicine for 6.0 hours CE. This Program is approved by BOC for 6 hours CE.

Presenters:
