WHAT IS BOXER SEARCH?
Boxer Search is the new way to find and access a much broader array of content from our collections, including journal articles, our local collections, CommonKnowledge and beyond. One search box, infinite possibilities.

WHY THE NEW SEARCH?
The migration is part of a major cooperative effort of the Orbis Cascade Alliance, a consortium of 37 academic libraries in Oregon, Washington and Idaho. This move from 37 systems to a single shared library system is a hallmark of our innovative collaboration, which brought you Summit, our shared lending/borrowing system, a decade ago. This is an ambitious undertaking: 37 libraries’ systems to 1 shared system, supporting you in your study, research and discovery.

HOW DO I REQUEST ITEMS FROM SUMMIT?
Items with the yellow dot are available through Summit. Use the “Get it” link under each title in a search to find requesting options.

CAN I STILL USE THE CLASSIC CATALOG?
The Classic Catalog will no longer be available. Use the facets during a Boxer Search session to limit your search in the same ways you could in the Classic Catalog.

WHERE CAN I LEARN MORE ABOUT BOXER SEARCH?
Please visit pacificu.edu/library/boxersearch.cfm for more updates, FAQs and features. Library staff are available to answer any questions.

HOW DO I LOG IN TO MY LIBRARY ACCOUNT?
Use the “My Library Accounts” link on the library homepage or sign in (the link is in the upper right hand corner) during a search session. You will still be able to see what you have checked out, your due dates and be able to renew online. See the Library Account brochure for more details.

CAN I STILL USE WORLDCAT TO FIND ITEMS?
Yes, you can still visit worldcat.org, but pacificu.worldcat.org will only be available for a short time after the launch of Boxer Search. If you have created lists of items in Worldcat, you will still be able to access those lists.

WHICH DATABASES ARE INCLUDED?
As data is made available for our subscribed databases, they’ll be discoverable in Boxer Search. We are excited that articles are searchable and easily accessible in Boxer Search. You can seamlessly access full-text articles owned by Pacific from your initial search.

WILL THE NEW SEARCH WORK WITH CITATION MANAGEMENT TOOLS?
Yes. You can export results to various tools although it may be slightly different from the way you were used to exporting citations.

BOXER SEARCH IS BIG:
The migration to the new search is happening at 37 Alliance libraries, harvesting 8.8 million titles which represent 26.4 million resources.
